

# ScanMail™ Suite for Microsoft™ Exchange

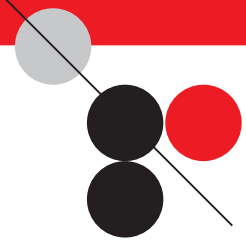

## High Performance Mail Server Security with Minimal IT Impact

Today's aggressive, subversive email threats demand powerful, multi-layered messaging security—beyond the capabilities of Microsoft Exchange, which does not include built-in virus scanning. While gateway security is needed to stop viruses and other threats at the perimeter, mail server security is critical for inspecting inbound and stored mail, plus internal communications.

ScanMail Suite for Microsoft Exchange delivers more effective, high-performance mail server security—#1 in the mail server AV market for 5 consecutive years.\* In addition to blocking viruses, spam, phishing, and unwanted content, the new version includes advanced protection against spyware and zero-day threats. ScanMail is optimized for your Exchange environment—whether you have Exchange Server 2000, 2003 or the new 2007. Improved scan efficiency and tighter integration reduce IT impact, infrastructure and management costs—for a strong return on investment.

FEATURES	FUNCTIONS
<b>Award-Winning Antivirus Security</b>	<ul style="list-style-type: none"> <li>Stops viruses, Trojans, and worms hidden in email and attachments</li> <li>Detects known, unknown zero-day threats using IntelliTrap technology</li> <li>Applies the latest threat intelligence as email moves through the network and resides in the mail store—for up-to-the-minute protection</li> </ul>
<b>New! Spyware Protection</b>	<ul style="list-style-type: none"> <li>Delivers dedicated signature- and heuristic-based spyware detection</li> <li>Stops email-borne spyware at the mail server</li> <li>Prevents data loss, identity theft, and related compliance violations</li> </ul>
<b>Optimized for Exchange</b>	<ul style="list-style-type: none"> <li>Performs multi-threaded real-time, scheduled, and manual scanning</li> <li>Leverages new features of Exchange 2007, including Microsoft AV Stamp to avoid redundant message inspection for greater efficiency</li> <li>Supports native x64- and x32-bit processing for higher performance</li> </ul>
<b>Ease-of-Management</b>	<ul style="list-style-type: none"> <li>Enables centralized management with a single, Web-based console</li> <li>Simplifies group configurations, policy definition, and deployment</li> <li>Integrates with Microsoft™ Operations Manager (MOM), Outlook™ Junk Email folder, Exchange clusters, and more</li> </ul>
<b>Advanced Anti-Spam &amp; Content Filtering</b>	<ul style="list-style-type: none"> <li>Stops spam &amp; fraudulent phishing-related emails—at high catch rates</li> <li>Offers the ability to override Microsoft Spam Confidence Level</li> <li>Enables advanced content filtering based on Boolean and regular expressions, keywords, file size, true file type, etc.</li> </ul>

SOFTWARE

**Protection Point**

- Mail Server

**Threat Protection**

- Antivirus**
- Anti-Spyware**
- Anti-Spam**
- Anti-Phishing**
- Content Filtering**

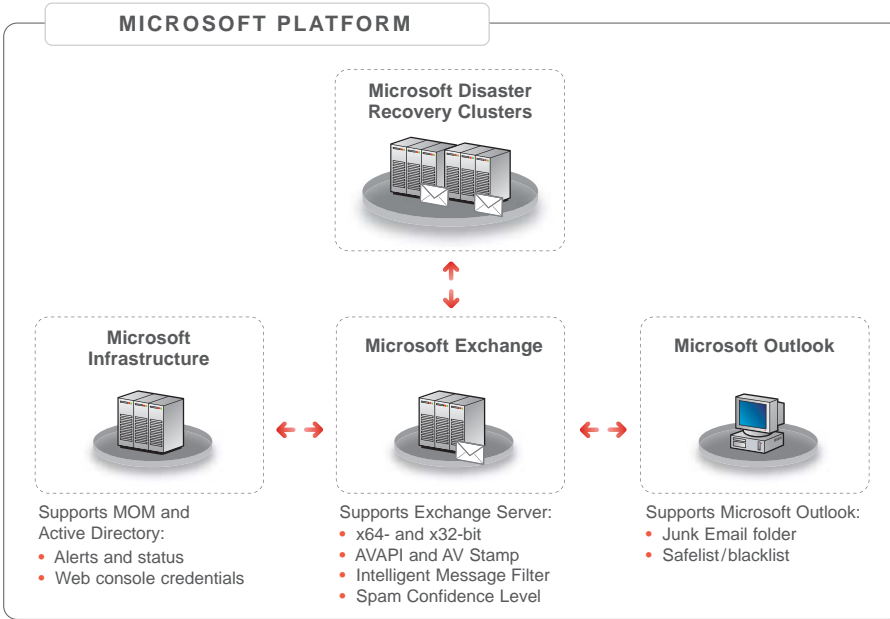

### KEY BENEFITS

- **Multi-threat Protection**  
Prevents infection, data loss, compliance violations, lost productivity, and network downtime
- **Optimized Performance**  
Minimizes IT impact and improves mail server stability
- **Lower IT Workload**  
Reduces IT management costs through tight Microsoft integration
- **Trusted Security Advisor**  
Provides deep threat expertise—for superior protection and peace of mind

## ScanMail™ Suite for Microsoft™ Exchange

As a Microsoft Gold Certified Partner, Trend Micro ensures ScanMail seamlessly integrates with your Microsoft infrastructure. ScanMail supports Microsoft clusters, email and spam management features, and more—for minimal IT impact and streamlined administration.
