

XE2 removes the complexity of operating Exchange e-mail, Archiving, SharePoint, CRM and BlackBerry. We manage and host everything so you can **keep working at 100%**

at a glance:

- access and share information via the internet and via mobile devices
- integrates fully with both Microsoft Exchange and Microsoft Office products
- empower managers and teams to initiate and control their own workspaces without compromising security
- improve productivity – create workspaces, coordinate calendars, receive alerts, and much more
- control and customise your information with advanced administrative controls

Hosted SharePoint

product datasheet

Why choose SharePoint?

All businesses need to share information. Now this can be done via the internet, or through your own network. Microsoft's SharePoint software allows you to improve the way that your employees communicate, share documents and gather knowledge.

It is particularly beneficial for those organisations that have multiple projects operating across wide geographic boundaries. Mobile work forces, multi location offices, supporting companies that want to run an effective human resources department and any business that wants to enable effective communication and collaboration across the whole business.

The cost of designing, building, integrating and operating such a solution is a major commitment, outsourcing is the perfect solution for many organisations. It allows you to focus on your core services, without worrying about the cost and complexity of providing a business grade solution.

With our hosted service, there are absolutely no set-up, hardware, software or support costs. There's just a regular fee each month depending upon the number of users enabled.

XE2 is a Microsoft Gold Certified Partner. We have designed and delivered a scalable hosted Exchange platform, incorporating Windows SharePoint Services. This frees you from needing any messaging systems on-site as XE2 manages and maintains both services.

Key Features and Benefits

Quick launch bar

This feature allows you to access specific documents, pictures, lists and other content quickly. The bar can be edited to include different content.

Document libraries

You can collect and share documents, forms and other content online. You can set up as many libraries as you need.

Documents can be edited online, or comments added. The version history of each document is clearly shown. Alerts for individual users can be set up too.

Discussion boards

This feature allows you to set up and control a place for newsgroup-style discussions.

Surveys

It's possible to set up surveys to poll other site users, with features that allow you to create questions and define how users specify their answers.

What's included

- Secure sign in for nominated users
- Familiar look and feel of Office Outlook
- Easily author and manage documents
- Set document specific security controls
- Ensure integrity with option to require document check-out before editing
- Review past revisions and restore to previous versions
- Communication features to let users know when actions are required or important changes made to existing information
- initial set up, customer support and system monitoring
- our service level guarantee
- a future-proof solution that upgrades with the product life cycle
- Self administration portal

Our service partners:

Why choose XE2?

Our customers demand a secure, reliable and financially sound service of the highest quality.

Unique in our field, XE2 delivers class-leading service built on our partnership with NTT Europe Online, giving customers one of the best solutions in the market today. They are also a Microsoft Gold Partner, and accredited with BS7799, ISO 9001 and SAS 70.

We offer comprehensive services and products, with all the necessary hardware and software included – either hosted at NTT Europe Online's data centre, or on your own premises.

We focus on cost efficiency to ensure affordability, and we add real value to your business – increasing efficiency, peace of mind and flexibility.

Altogether, this delivers a formidable solution for organisations of all sizes.
